COURSE CONTENT:

The Aquatic Facility Operator Course is a training program specifically designed to meet the needs of those working in the public and semi-public recreational pool or water park facilities. The AFO program offers unique discussions on risk management, not usually directed towards operations personnel.

The course provides information and training for both supervisory and operation personnel. In depth instruction will be given on filtration, disinfection, water testing and treatment, design consideration, facility management, facility troubleshooting and much more.

The AFO certification course is the most comprehensive program available for those responsible for operating clean, safe, and efficient aquatic facilities.

Please bring calculator and number 2 pencils for test.

AFO CERTIFICATION:

The AFO test is administered from 4-6:00 PM on the last day of the course.

The material packaged consist of the following: AFO Manual, Prep Manual, Exam, Course Handouts, Certificate and CEU Form.

Upon successful completion of the AFO course and the 50-question exam Participants Will be officially certified by NRPA. Certification is valid for five year and renewable.

Text content:

This course features the NRPA's Aquatic Facility Operator Manual, the most complete and comprehensive publication available on pool operations. Author Kent G. Williams combines wit and over 30 years of experience to clearly lead even the beginning pool manager through the often-complex processes in aquatic operations. The manual undergoes revision every three years to keep current with changing technology. The manual is user friendly and enjoyable to read.
