

# System:3<sup>®</sup> Mod Media<sup>™</sup> Filters—SM Series by Sta-Rite

## One cleaning for an entire season?

System:3 Mod Media filters from Sta-Rite handle 2–3 times more dirt than other filters to deliver maintenance-free performance for up to a full season. Featuring perfectly balanced flow and an integral manifold design, these filters are engineered to deliver the ultimate in labor savings. System:3 Mod Media filters are ideal for inground pools, inground hot tubs and water features.

- Balanced-flow tank hydraulics direct water through each side of the filter module for uniform dirt loading, no clogging and long, unattended operation.

- Complete media coverage combined with shallow pleats for greater dirt-holding capacities, longer filter cycles and less cleaning.
- Shallow pleat design also permits quick and thorough cleaning—just rinse the module with a hose.\*

### AN ECO SELECT<sup>®</sup> BRAND PRODUCT

The System:3 Mod Media filter has earned the Eco Select brand distinction from Pentair for its efficiency and environmentally friendly performance.

\* Modules used in conjunction with certain pool/spa sanitizers may require soaking in special cleaning solutions.

# System:3<sup>®</sup> Mod Media<sup>™</sup> Filters—SM Series

- Top-mounted pressure gauge conveniently located for at-a-glance viewing
- Split tank design permits rinse-in-place cleaning
- Posi-Lok<sup>™</sup> clamps provide secure access to tank and filter module
- Dual drain plugs available—side plug to remove waste; bottom plug to drain entire filter
- Balanced-flow tank hydraulics provide maximum dirt-loading and prevent clogging

## Performing to a higher standard

Based on extensive research in filtration and media science by Sta-Rite<sup>®</sup>, System:3 Mod Media filters make Ultra-Capacity Filtration<sup>™</sup> a reality. Unlike conventional “cartridges,” these filters combine a balanced-flow and integral manifold design, plus an easily cleaned media element. Modular filter tanks permit quick change of filter media. The result is a filter system that not only requires less frequent cleaning but is also easy to clean.

The System:3 Mod Media filter is constructed of Dura-Glas<sup>®</sup> high-density composite resin to weather the elements for long, dependable life. And its sleek, contemporary appearance and matte black finish look attractive in any pool setting.

### Dirt-Loading Comparison

Handles 2–3 times more dirt than other media-type filters—up to an entire season without cleaning!

### Ultra-Capacity Filtration

Balanced-flow tank design assures debris is evenly collected by the media—no clogging or long runs between cleanings.

### Filter Performance

Model	For Pools up to 8 Hr. Turnover (Gal.)	Filter Area (Sq. Ft.)	Flow Rate (GPM)
S7M120	48,000	300	100
S7M400	55,000	400	115
S8M150	60,000	450	124
S8M500	62,400	500	130

**Operating Limits**—Maximum continual operating pressure is 50 psi. For pool/spa (bather) applications, the maximum operating water temperature within the filter is 104° F (40° C).
