

IntelliPro^{XF}

Variable Speed Pump
by Sta-Rite®

The highest-efficiency
pump we've ever made!

Our most advanced, most **energy-efficient** pool pump innovation

An Eco Select® Brand Product

The Eco Select brand identifies our “greenest” and most efficient equipment choices. By combining the superior internal geometry of next-generation **XF** pumps with super-efficient variable speed technology, the IntelliPro**XF**® Variable Speed Pump delivers the greatest energy savings ever while reducing noise pollution and the consumption of valuable resources.

Cam and Ramp™ Lid removes easily, locks in place with a quick quarter-turn and is see-through for easy basket inspection

More accessible wiring compartment makes wiring easier.

TEFC design keeps motor shielded from the elements for extended life

Unions are included for connecting directly to 2.5" or 3" plumbing

Internal hydraulic isolator separates priming water from pumping water, smoothing the internal water flow for faster priming *and* greater efficiency—not just one or the other, like most pumps

Since its introduction, the IntelliProXF Variable Speed Pump has given pool owners the remarkable energy savings of variable speed technology and super-efficient hydraulic design.

Now, the IntelliProXF pump is even easier to program and monitor, thanks to a more intuitive interface. The control keypad can be rotated for convenient orientation on the pump. Plus, its optional wall mount kit gives you greater flexibility. An easily accessible wiring compartment helps make setup fast and simple.

Whether you own a small and elegant pool or one that's large and feature packed, you'll enjoy the advantages of the most advanced, smoothest-running and most energy-saving pump we've ever made.

Economical

- You get typical savings of up to **\$1,600** each year* compared to traditional pumps.
- Even greater savings are achievable on larger pools—which are typically equipped with higher horsepower pumps.
- The same energy-efficient permanent magnet motor design that makes today's hybrid cars so fuel efficient.
- Motor speed is precision matched in real time to your pool's needs.
- Eight programmable speed settings and 24-hour clock for scheduling assure optimum speed and run times to maximize efficiency and cost savings.

Powerful

- Effortlessly powers large residential and feature-rich pools with waterfalls, slides, fountains or other special effects.
- Perfect for commercial pools, too.

Quiet

- The quietest pump on the planet—thanks to its permanent magnet motor, totally enclosed fan-cooled (TEFC) design and the fact that it can operate at lower speeds.

Dependable

- Field-proven reliability no other variable speed brand can match.
- Longer run-times at slower speeds improve filter and chlorinator performance and helps reduce algae occurrence.
- Built-in self-diagnostics protect the pump for longer life.
- Permanent magnet motor runs cooler and smoother than induction motors for added longevity.

*Savings based on variable speed pump compared to single-speed pump running 12 hours per day at an average of \$0.16 kWh in a 20,000 gallon pool. Actual savings may vary based on local utility rates, pool size, pump run time, pump horsepower, pump rpm, plumbing size and length, pump model, service factor and other hydraulic factors.

ENERGY STAR® Certified IntelliProXF pumps from Pentair meet strict energy efficiency criteria set by the U.S. Environmental Protection Agency and the U.S. Department of Energy. These pumps save money, reduce energy use and protect the environment.

IntelliProXF[®]

Variable Speed Pump

Extra-large, robust basket means fewer cleanings; smooth inner surface for easy debris removal

Modular plumbing system means less need to cut and glue pipe

External port threads and included tool-free unions fit perfectly with just hand-tightening

Built-in handle makes pump easy to place on the equipment pad

More intuitive user interface makes programming and operation simple

Installer friendly, owner friendly

The IntelliProXF Variable Speed Pump is as easy to install as it is to manage. It's a drop-in replacement for all WhisperFlo[®] High Performance Pump models and an easy substitute for Challenger[®] High Pressure Pumps.

Once installed, the IntelliProXF pump is fully compatible with IntelliTouch[®], EasyTouch[®] and SunTouch[®] Control Systems, providing a range of options from indoor control panels to wireless remotes to manage pool heating, lighting, spa jets, water features and more. Add the optional ScreenLogic2[®] Interface, and IntelliTouch and EasyTouch system owners can enjoy pool and spa control using their PC, Mac[®] computer, iPad[®], iPhone[®], iPod touch[®] mobile digital device, or Android[®] device.

IntelliProXF pumps also work with other manufacturers' pool/spa controllers when used with a separately purchased IntelliComm[®] II adapter.
